During the three first months of ESSnet Big Data II (Nov. 2018-Jan. 2019) all preparatory work was performed and three fully operational websites were created, the first two also being wiki collaboration platforms:

- https://webgate.ec.europa.eu/fpfis/mwikis/essnetbigdata/, Mediawiki-based, open for viewing to all but with managed editor rights reserved for project participants; it serves both as a collaboration platform for project coordination and the content workpackages, and as an extranet for disseminating progress and results;
- https://webgate.ec.europa.eu/fpfis/wikis/display/EstatBigData/ESSnet+Big+Data+II, Confluence-based, restricted to project participants and used for personal, financial, and commercially or otherwise confidential information;
- https://ec.europa.eu/eurostat/cros/content/essnetbigdata_en, a CROS Portal mirror site of the Mediawiki website, replicating its upper navigation levels and linking to the content managed there.

The suite of websites has been intensively used from the very start of ESSnet Big Data II and will be expanded, adapted and kept up and running during the whole course of the project.
